DESCRIPCIÓN

Afilador manual diseñado para usuarios profesionales que requieren mantener el filo óptimo de navajas y tijeras en campo o taller. Utiliza inserciones de carburo de tungsteno que trabajan ambos lados de la hoja simultáneamente, reduciendo el tiempo de afilado y asegurando simetría en el filo. Incorpora un protector de dedos integrado que minimiza el riesgo de cortes durante la operación. La ranura dedicada para tijeras permite recuperar el filo con movimientos rápidos y controlados. Su construcción compacta y bajo peso facilitan el transporte en kits de herramientas o bolsillos de trabajo.
