

INSPIRE SERIES – NOTIFIER

NOTIFIER Panel Feature Activation

Introduction

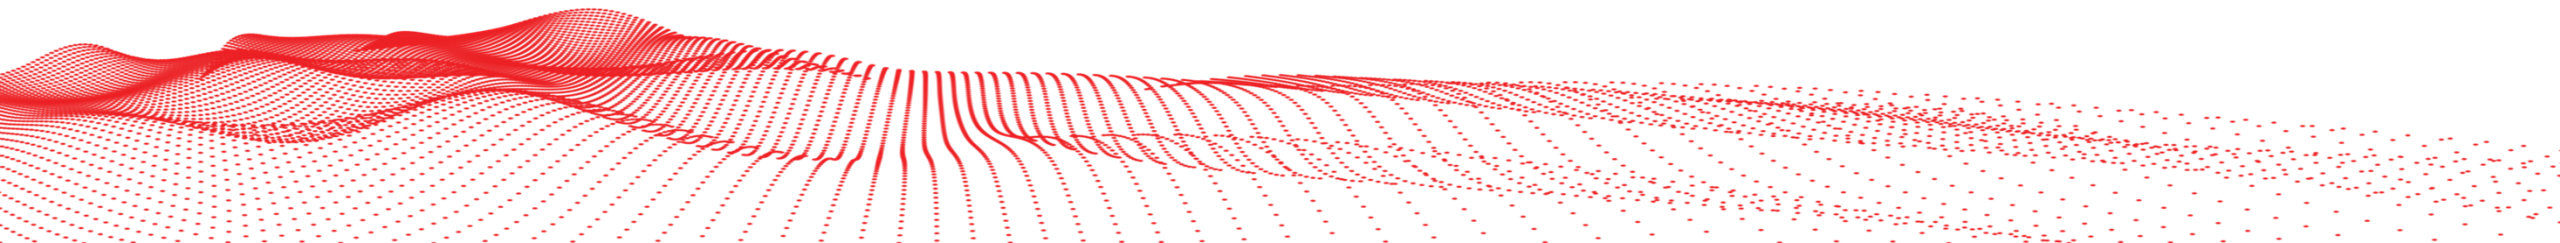

This module guides you through licensing the Inspire (N16) Fire Alarm panel to add on features through the Honeywell Connected Life Safety Services website and VeriFire Tools.

* Internet access required on VFT tools laptop

INSPIRE SERIES - NOTIFIER

Purchasing the License on CLSS Site Manager

- Click on the user's name in the upper right corner and select the **Manage Access** option
 - Make sure you are logged in as an Admin with purchase rights as only purchase admin profile will have the option to buy the licenses

Direct Feature Activation Through VeriFireTools

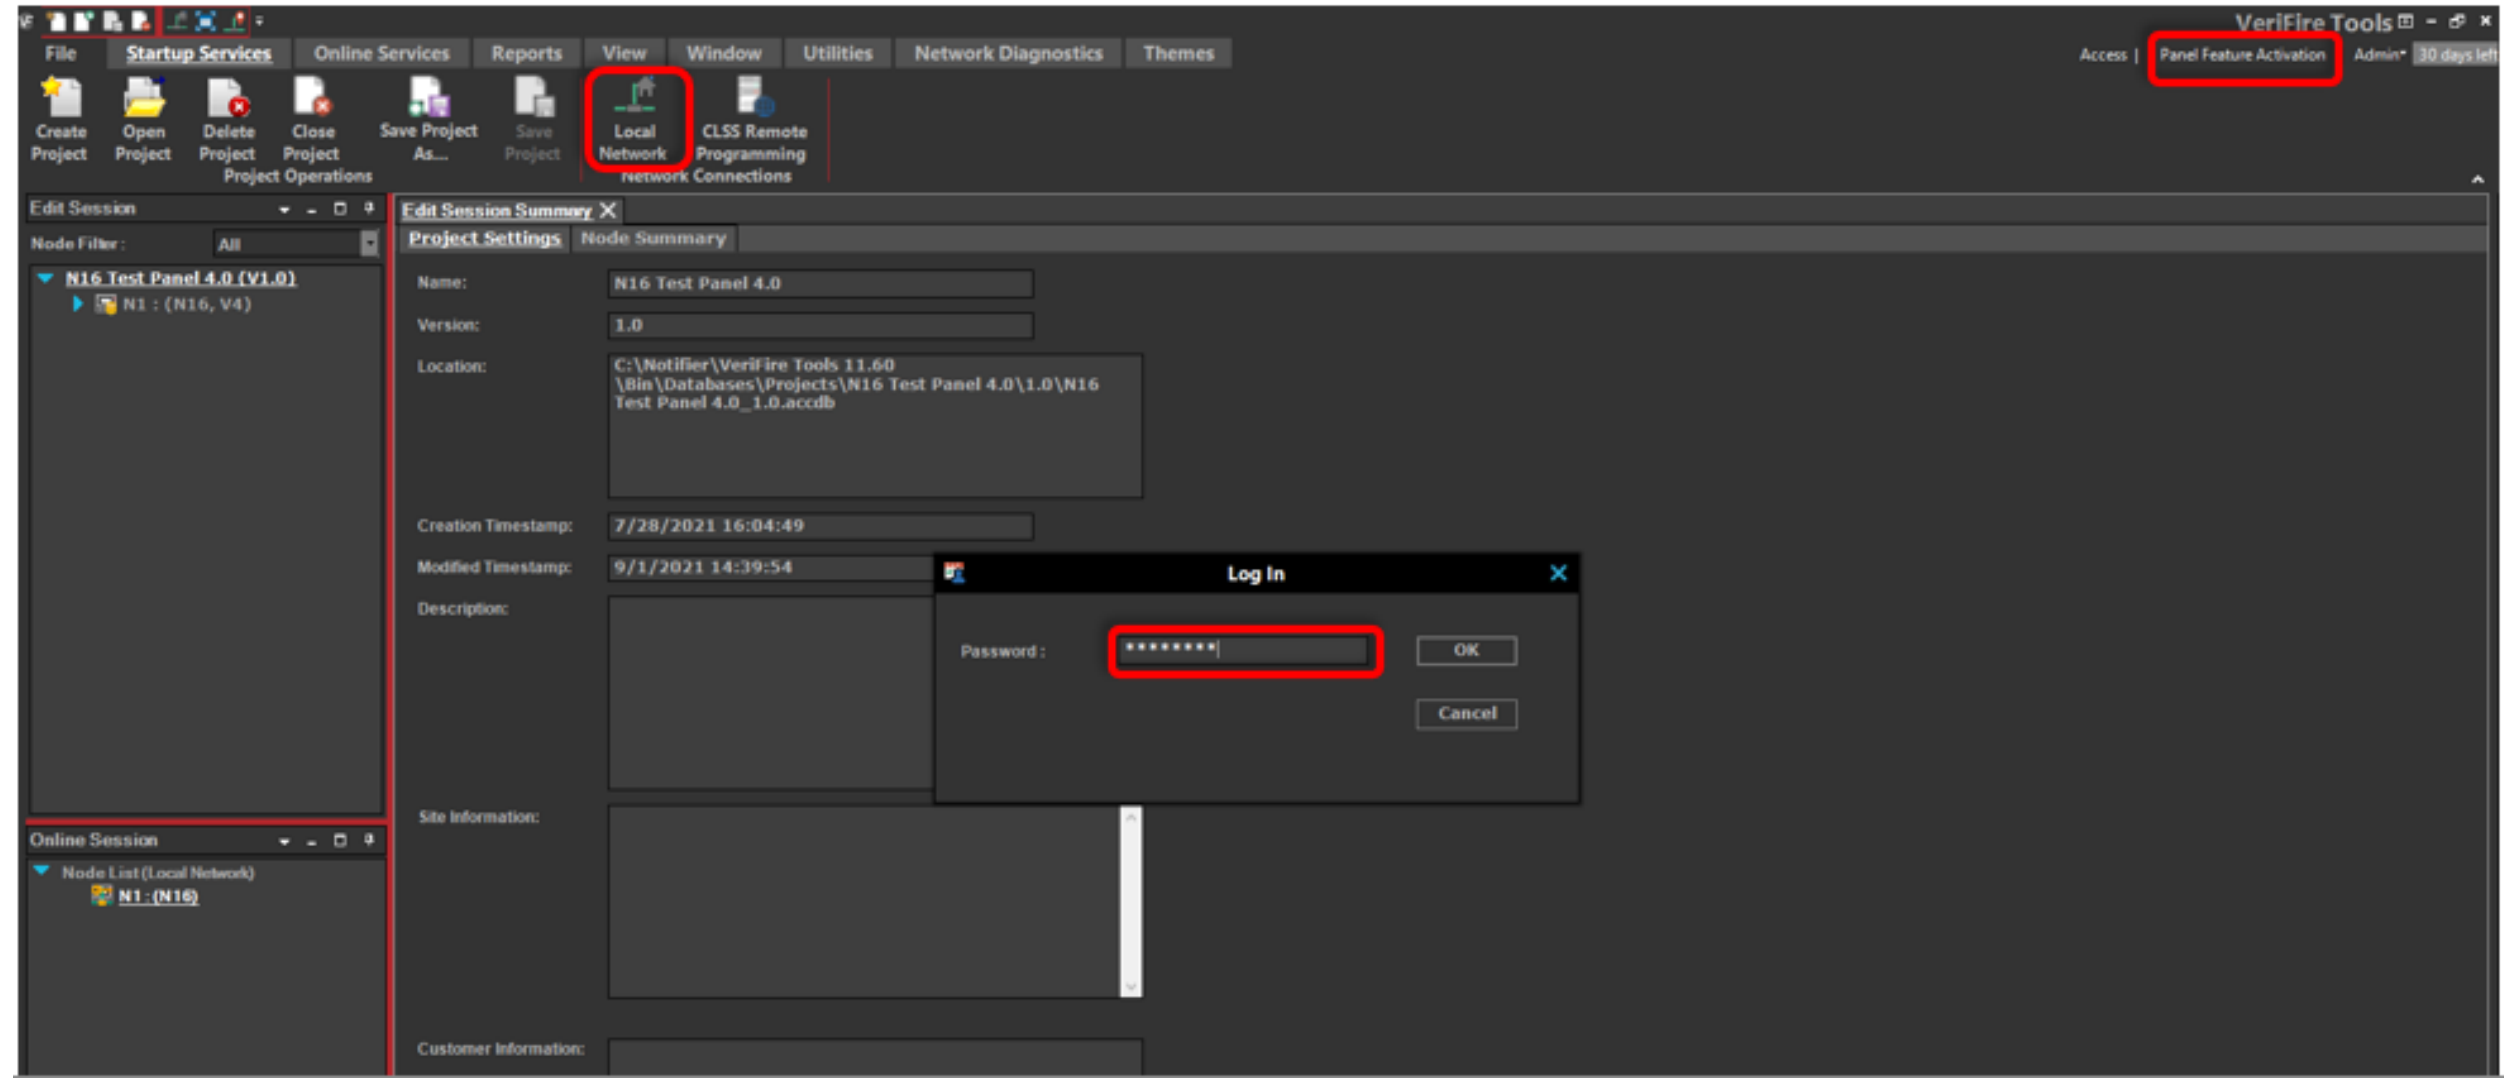

This option is used when the desired feature(s) has been purchased through the CLSS Site Manager but has not been assigned to the panel

- Open VeriFire Tools
- Open an existing project or create a new project for the panel you wish to add features to

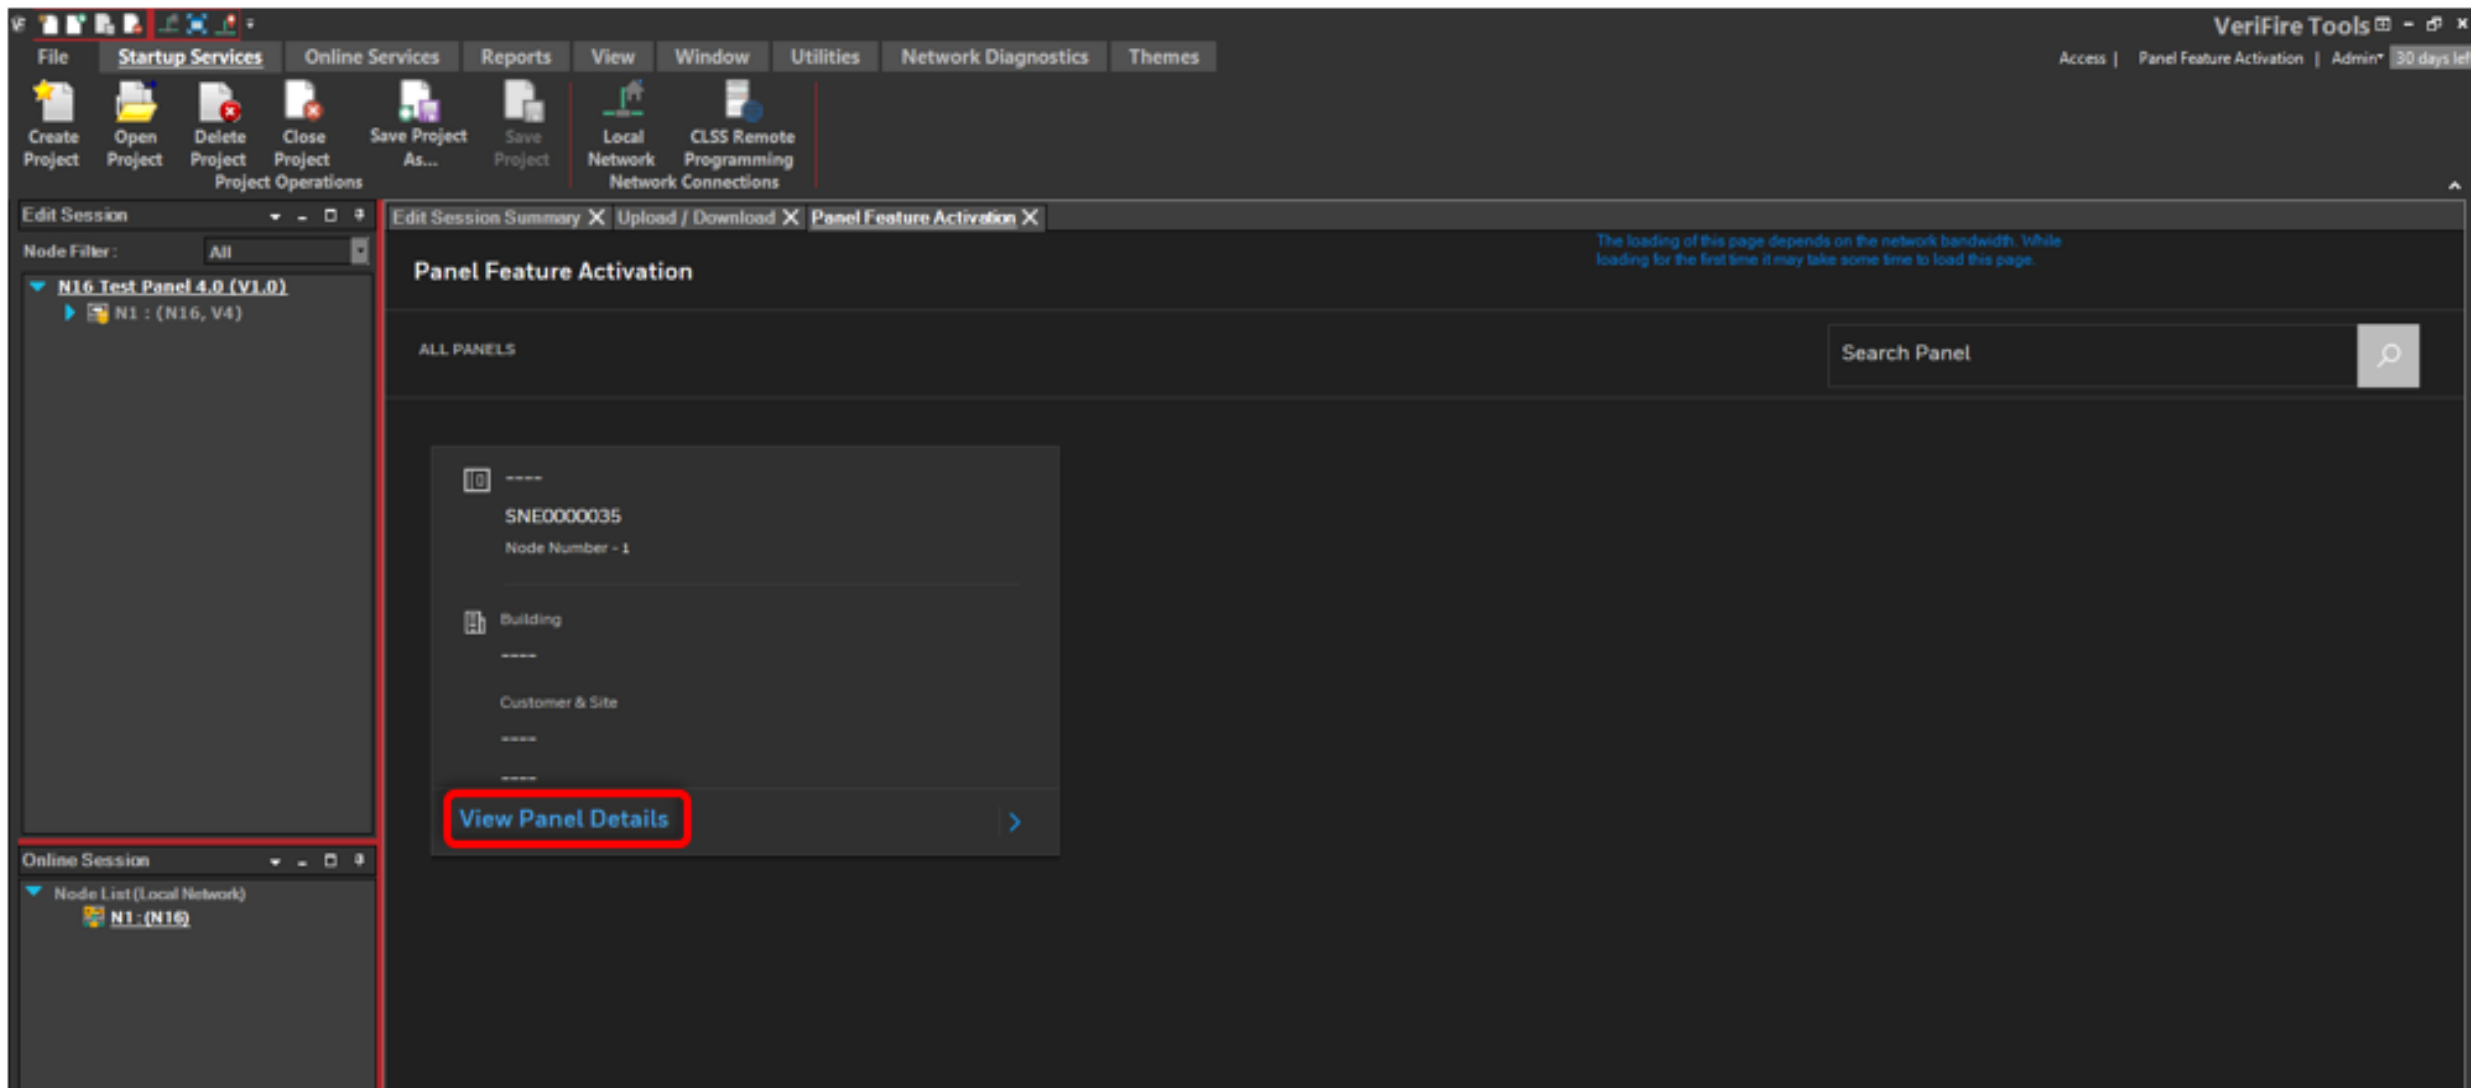

- Make sure you are connected to the panel via USB/NUP connection
- Click Local Network
- Log in to the panel with the Service Tool Password
- Click Panel Feature Activation

- Once the panel serial number dialogue box displays, click View Panel Details
 - Make sure that the laptop with VFT has an internet connection

**Depending on your network connection loading this page for the first time may take some time.*

- Available features will be displayed. Only unused purchased vouchers would be displayed. To purchase additional licenses [Purchase on CLSS Site Manager](#)
- Enter the quantity of the desired features you wish to add to the panel
- Click Generate License

License File Download to Node

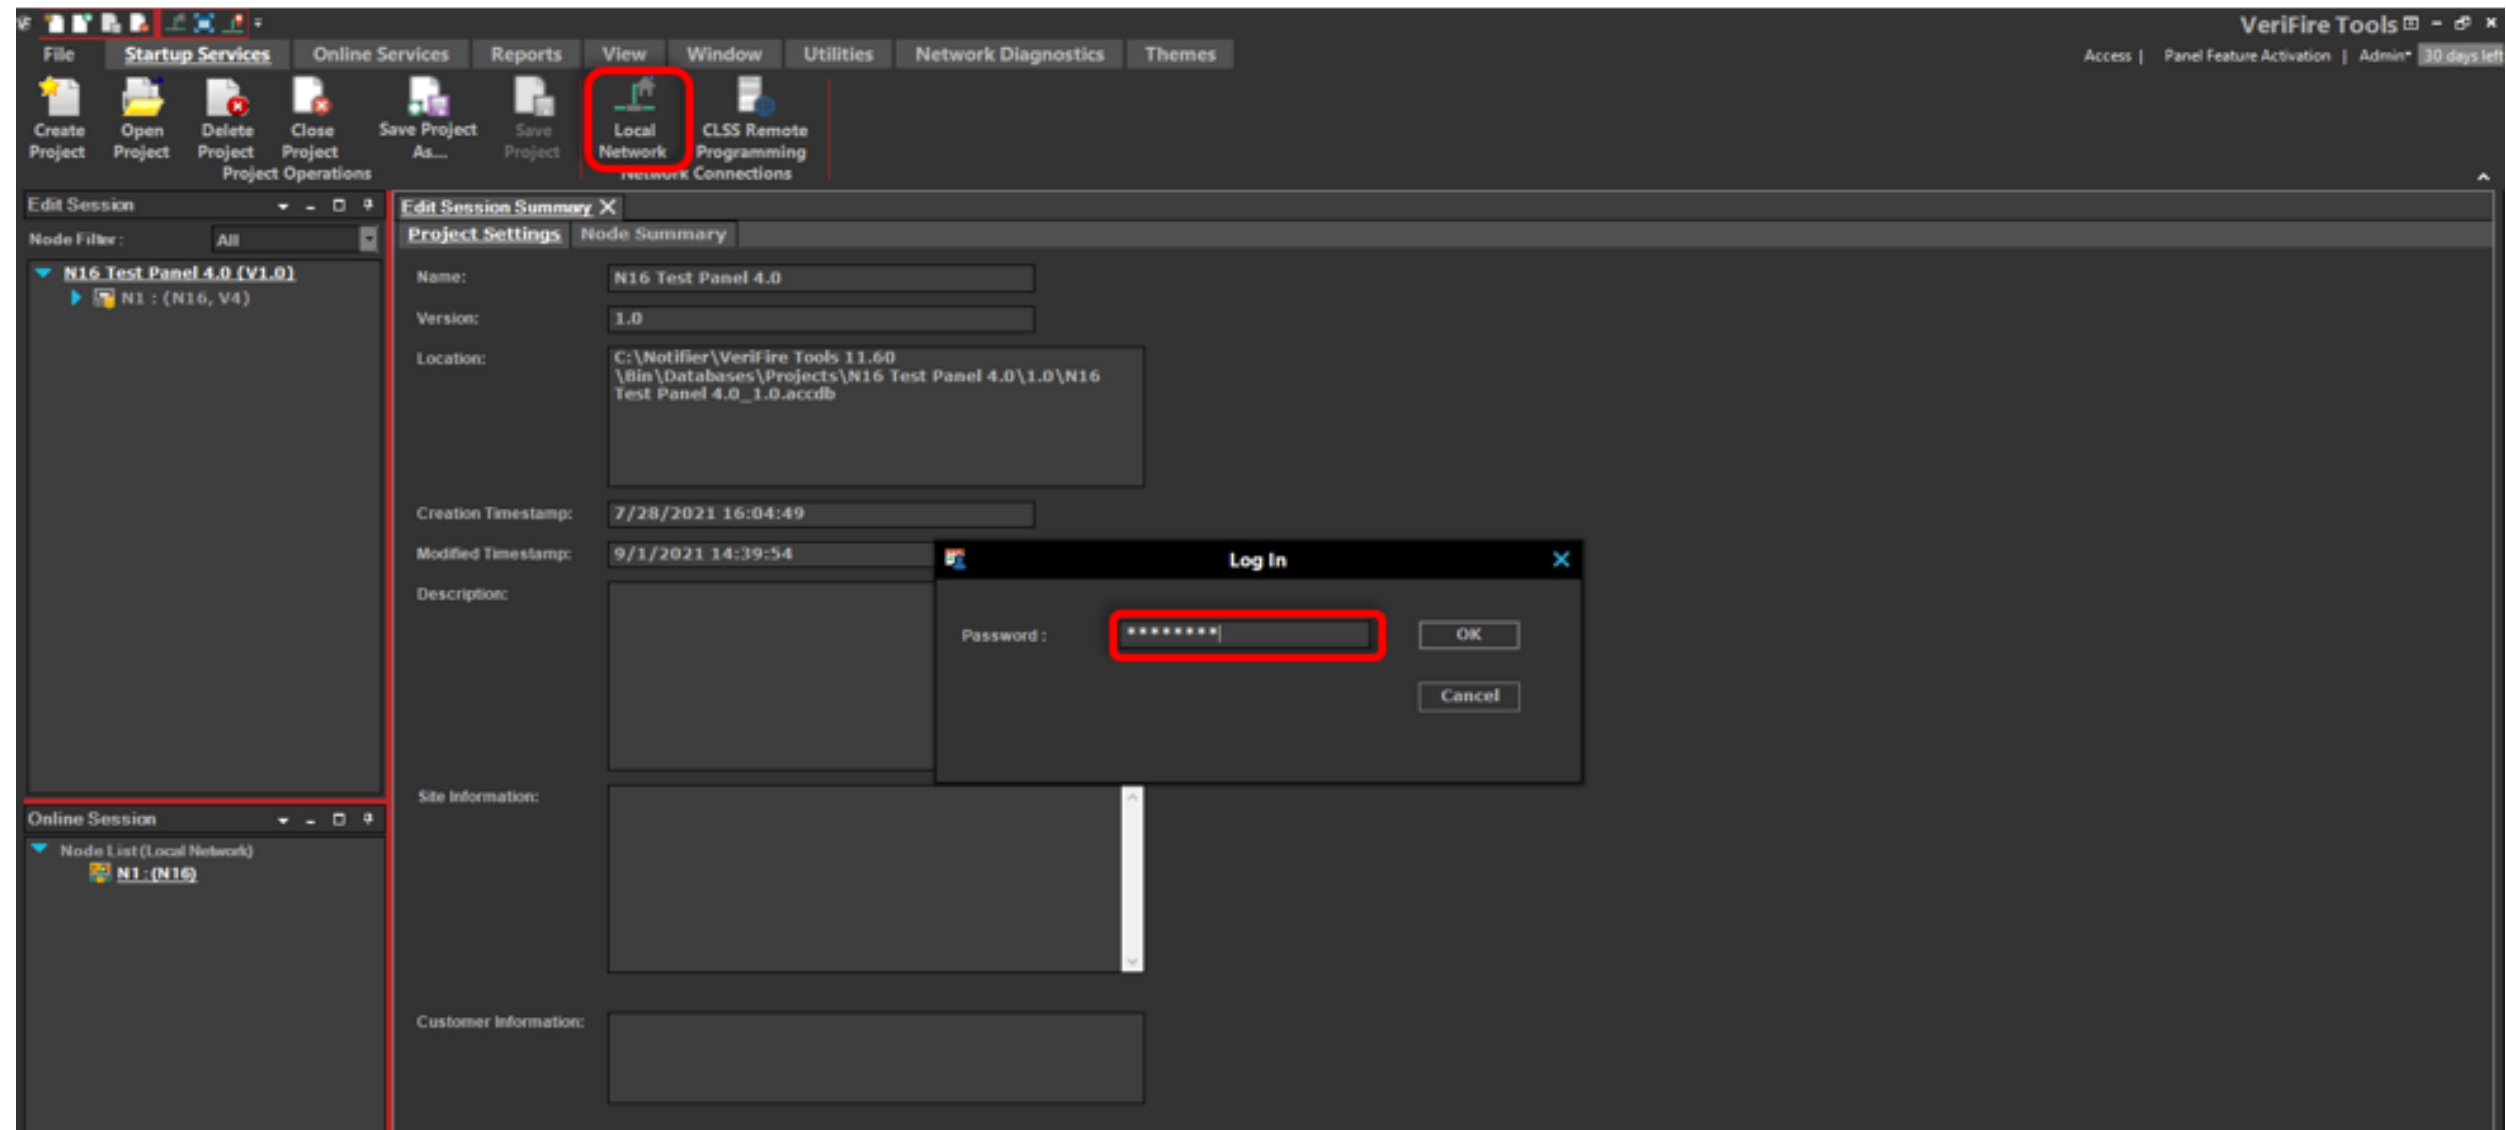

This option is used when the desired feature(s) have been purchased on CLSS Site Manager and assigned to the panel serial number in the CLSS website

- Open VeriFire Tools
- Open an existing project or create a new project for the panel you wish to add features to

- Make sure you are connected to the panel via USB/NUP connection
- Click Local Network
- Log in to the panel with the Service Tool Password

- Check the node to add the feature to
- Select Download to Node
- Click Browse to find the license file

The screenshot displays the VeriFire Tools software interface. The main window is titled 'VeriFire Tools' and shows a 'Panel Feature Activation' window with tabs for 'Set Up', 'Status', and 'Upload / Download'. The 'Upload / Download' tab is active, showing 'Operation Setup' with 'Download to Node' selected. Below this, the 'Operation' section shows 'License File Download'. The 'Upload Diagnostics Files' section has checkboxes for 'Log Archive1', 'Live Log1', 'Core Dump', 'Log Archive2', and 'Live Log2'. The 'Project' section has a 'Browse...' button. The 'AM2020 / AFP1010 Project' section also has a 'Browse...' button. The 'Online Session' section shows a 'Node List (Local Network)' with 'N1: (N16)' selected. The 'Node' and 'Type' columns in the 'Node List' are highlighted with a red box.
